INDEX.

Adam, Dr Walter, on the osteology of the hippopotamus, 361
Advantages of a Short Arc of Vibration for the Clock Pendulum, by Edward Sang, 137
Agassiz, Professor, his great work on Fossil Fishes noticed, 401
Analyses, chemical, of stratified rocks altered by Plutonian Agency; also of the basaltic rock of Largo Law, and the Wollastonite of Corstorphine Hill, 388
Anatomy and Physiology, comparative, work on, by Dr Grant and others, noticed, 403
Animals, numerical relations of, from Linnæus to the present time, 221
Antediluvian ambergris, 399
Arago on ground-ice, 123—on the influence of the moon on rain, vegetation, and diseases, 188
Arnott, Walker, F. R. S. his characters of new or little known genera of plants, 176, 378
Arts, Society of, the proceedings, 204, 393.—Prizes offered by, 205
Atmosphere, colour of, considered, 348—absolute weight during Cholera, &c. proved to be greater than at other times, 395—weight of, at new and full moon, 397
Avalanches in Grusia, 192

Barometric Tables for the use of Geologists and other scientific travellers, noticed, 400
Basaltic rock of Largo Law, account of, 388
Belemnites found in Talc-slate, 399
Boyle's work on the Botany and Natural History of the Himalaya Mountains, noticed, 403
Bridgewater Treatises, notice of, 402
British rocks, specific gravity of, 194

Candolle on the Age of Trees, 330
Carnelian, inflammable matter in it noticed, 296
Carrara marble, discovery in regard to which, by Hoffmann, 194
Celestial Phenomena from July 1. to October 1. 1833, 106—from October 1. 1833 to January 1. 1834, 389
Christie, Dr Alexander Turnbull, proceedings of, 153—his death and character, 156
Chrome, results of experiments on the economical and medical uses of its oxides and salts, by Prof. Jacobson of Copenhagen, 157
Clay for sculptors, 201
Coden, observations on its characters and affinities, by David Don, 53
Cuvier, Baron, his Eloge, by President Pasquier, concluded, 164—his eloge of Sir H. Davy, 1—his eloge of Vauquelin, 209
Cyclopedia of Anatomy and Physiology, by Professor Grant and others, noticed, 403

Dalton, John, F. R. S. summary of the rain, &c. at Geneva, and at the elevated station of the pass of Great St Bernard, for a series of years, with observations on the same, 101
Davy, Sir H. biographical memoir of, by Cuvier, 1
Davy, Dr J. his observations on phosphorus, 48
Diluvial action, facts regarding which, by William Thompson, 26
Don, Mr David, on the character and affinities of the genus Codon, 53—on the connexion between the calyx and ovarium in certain plants of the order Melostomaceæ, 68
Dry-rot, mode of preventing it, 203
Dwarfs, observations on, 142

Ehrenberg, Professor, account of his recent discoveries in regard to the Infusoria, 287
Elevation of the land of Scandinavia, observations on, 34
Emmet, Professor, on the solidification of raw gypsum, 69

Faraday on carbonate of lime, 399
Fee, M. his Life of Linnæus, 85
Felspar, compact, of the Pentlands, analysis of, 195
——— rock of Wardie, near Edinburgh, analysis of, 198
Fish-bones and scales in the coal-formation around Edinburgh, 194
Fossils, or organic remains in granite, 256
Fossil Fishes, Agassiz's great work on, noticed, 401
Fossil tooth in sandstone of the coal formation, 397

Galbraith, William, A. M., Tables of the Sun's mean right ascension, 97—his Barometric Tables for the use of geologists and scientific travellers, noticed, 400
Geneva, summary of the rain at, by Dr Dalton, 101
Geoffroy St Hilaire on dwarfs and giants, 142
Geological Map of Spain noticed, 398
Geology, chemistry of, by Dr Turner, 246
——— principles of, by Lyell, noticed, 400
——— of the south-east of England, by Mantell, noticed, 399
——— of Greece, noticed, 399
Giants, observations on, 142
Gibraltar, rock of, described by Professor Hausmann, 227
Graham, Dr, his account of rare and new plants, 181, 381—his notice of botanical excursions into the Highlands of Scotland in 1833, 358
Granada, the tertiary formation of, described, 364
Greenstone of Wardie analyzed, 195
Grierson, William, Esq. his observations on competition among the working-classes of tradesmen, being the substance of a paper read before the Society of Arts of Scotland, 105
Ground-ice, on the pieces observed floating in rivers, by Arago, 123—instances of, 192
Gypsum, raw, on its solidification, by Professor Emmet, 69

Hausmann, Professor, on the Physiognomy of Scandinavia, 73.—on the rock of Gibraltar, 227

Hermaphroditism, observations on, 198
Hoffmann on the nature of Carrara Marble, 194
Hot Springs of the Cordilleras, observations on, 151
Human species, on the varieties of, 308
Human body, specific gravity of different solid parts of, 159
Hygrometer, observations on, 273

Infusoria, account of, by Dr Sharpey, of Ehrenberg's late discoveries, 287
Influence of the moon on rain, 189—on vegetation, ib.—on diseases, 191
Innes, George, his Tables of Celestial Phenomena from July 1. to October 1. 1833, 185; and from October 1. 1833 to January 1. 1834, 389

Jacobson, Professor, his experiments on the economical and medical uses of the oxide and salts of chrome, 157
Johnston, J. F. W., on elevation of the land in Scandinavia, 34

Largo Law, basaltic rock of, analyzed, 388
Linnæus, life of, by L. A. Fee, 85
Lion-hunting in South Africa, account of, by Mr Leslie, 62
Lochend, near Edinburgh, the altered and unaltered slate-clay of, analyzed, 387
Lute for bottling wine, &c. 201
Lyell's Principles of Geology, vol. 3d, noticed, 400

Mammalia, numerical relations of, 221
Mantell's Geology of the South-East of England, noticed, 400
Maps, mineralogical, of Germany, 196—of Spain, 398
Medicine, on the state of, in Turkey, 255
Melastomaceæ, observations on, by David Don, F. L. S., 68
Models in relief of Wurtemberg, 197, 198
Moon, influence of, on rain, 189
——, supposed influence on vegetation, 189
——, on diseases, 19

Naturalist's Library by Jardine and Lizars, noticed, 401
Natural History books publishing in France, 402
Northern Lighthouses, some account of, 108

Oppenheim, Dr, on the state of medicine in Turkey, 255

Pasquier, Baron, his eloge of Cuvier concluded, 164
Patents granted in Scotland from 22d March to 31st May 1833,
Phosphorus, Dr Davy's observations on, 48
Preservation of substances by means of alkalies, 202
Prevost on the geological transition from chalk to tertiary deposits, 399
Prichard, Dr, on the varieties of the Human Species, 308

Redfield, C. on American steam-boats, 55
Rocks, British, specific gravity of, 194.—Chemical composition of rocks

XUM

near Edinburgh, by Messrs Drysdale and Walker, 195.—of changed stratified rocks, 387
Ruminating animals, observations on their vomiting, 200

Salisbury Craigs, the altered slate-clay of, analyzed, 387
Sang, Edward, on the advantages of a short arc of vibration for the clock pendulum, 137—his meteorological observations made at Edinburgh during the great solar eclipse of July 17. 1833—also his method of freeing the determination of the latitude of an observatory, and of the declination of a star, from the consideration of atmospheric refraction, 326
Scandinavia, its physiognomy described by Professor Hausmann, 73
————, its gradual elevation or rise, considered by W. Johnston, A. M., 34
Scarpa, Anthony, biographical memoir of, 233
Secondary rocks, chemical analysis of, from Wardie, near Newhaven, and the Pentlands, 195
Sharpey, Dr, his account of Ehrenberg's late discoveries, 287
Silvertop, Brigadier, on the tertiary formation in the province of Granada, 364
Slate-clay of Wardie, analysis of, 195—of Lochend, 387
Society of Arts of Scotland, proceedings of, 204, 393
Spain, geological map of, noticed, 398
Specific gravity of different solid parts of the human body, 159—of some British rocks, 194
Steam-Boats, American, observations on, by Mr C. Redfield, 55
Stucco for walls, 202
Sun's mean right ascension, tables of, by W. Galbraith, 97

Tooth, fossil, in red sandstone, account of, 397
Trees, on the longevity of, 330
Trilobite, living species of, discovered, 398
Turkey, on the state of medicine in, 255
Turner, Dr Edward, his lecture on the chemistry of geology, 246

Varieties of the human species, observations on, by Dr Prichard, 308
Vauquelin, L. N., his eloge by Baron Cuvier, 209
Vomiting in ruminating animals, experiments on, 200

Water, deep, on the colour of, 348
Wight, Robert, M. D., his characters of new or little known genera of plants, 176, 378
Witham, H., his new work on fossil trees, noticed, 402
Wollastonite of Corstorphine Hill, analyzed, 388
Wool, method of cleansing it of its grease, and economizing the residue, 202
Working classes, on competition among, 105

Xavier de Maistre, Count, on the colour of the atmosphere and deep water, 348

PRINTED BY NEILL & CO. OLD FISHMARKET.
